Project

E-commerce(HTML,CSS).
- I will frontend design like amazon online shop

Stack Visualization Web/*HTML,CSS,JAVASCRIPT*

https://prabhukumar2002.github.io/webdesign/

- **Developed a Stack Visualization Web Application** using HTML, CSS, and JavaScript to demonstrate stack operations (Push, Pop, Peek, and Size).
- **Designed a user-friendly interface** with input fields and buttons to interact with the stack, providing real-time visual feedback.
- **Implemented dynamic stack operations** with JavaScript, including stack overflow and underflow checks, enhancing the robustness of the application.
- **Styled the application** using CSS to create an aesthetically pleasing and intuitive user experience.

proposing greetings| *HTML,CSS,JAVASCRIPT*

https://prabhukumar2002.github.io/Perfect/

- *An interactive web project featuring draggable and rotatable "paper" elements displaying personal messages and images. It uses **HTML, CSS**, and **JavaScript** to create a visually appealing and engaging user experience. The project demonstrates creativity and technical skills in web design and development.*

FeedBack of S-Mall /*HTML,CSS,JAVASCRIPT(click)*
- The motive of this project is to make sure the Mall is perfect at it's working and serving the society. .
- One of the best web page to get the feedback.
